ABOUT THE COURSE

SAP PS

SAP Project System (SAP PS) is a specialized module within the SAP ERP suite designed to support the planning, execution, and monitoring of project-based activities. It enables organizations to manage the entire project lifecycle—from structuring and budgeting to scheduling, execution, and settlement. Integrated with modules like SAP MM, SD, FICO, and HR, SAP PS offers real-time visibility into project performance, resource allocation, and cost control. It supports different types of projects including customer projects, internal development, and capital investments. With SAP PS, businesses can ensure timely delivery, optimized resource usage, and financial accuracy, making it essential for project-driven industries.
